## **inconso supports Ernsting's family with new Warehouse Management**

### **Textile company implements SAP EWM on both logistics locations**

Bad Nauheim, March 2nd, 2012

The textile retailer Ernsting's family GmbH & Co. KG has sales centers located in Coesfeld-Lette and Coswig-Klieken for the delivery to ca. 1,600 of the company's own branch stores. inconso AG has been commissioned with replacing the existing warehouse

management system with a SAP EWM based warehouse management system on both locations.

The existing warehouse management software should be seamlessly replaced by the end of 2013. The replacement completed by inconso offers a reliable basis for the future modifications of the logistics processes and transport paths. The new system convinces through the clarity, transparency, ergonomic and intuitively designed user interface that make its operation easy.

With these improvements, a higher process security in all the warehouse based processes should be assured for the long term. Through this approach, the expanding textile retailer ensures the delivery of goods on time and cost efficiently now and in the future. The technical resources already existing at Ernsting's family GmbH & Co. KG, the automatic warehouse, connecting conveyor technology, labeling workstations and RF equipment were all integrated with the new warehouse management system and can be used more efficiently.
